

Petition 04-160 is ridiculous. XM radio is paid for by millions of people, and they pay for their service. The local stations do not have the same quality of information that the satellite radio can give us. I deliver pizzas in Orlando, and I use the traffic station all the time. If I were to listen FM radio, I would have to wait for an hour to an hour and a half for traffic updates, and they don't even give half the information that I get from XM. XM's service is of better quality, and I pay for that quality. There should be no reason to cancel the weather and traffic stations.
